PRESENTATION

By Younus Ahmed

INTRODUCTION

FarmConnect is a Java console-based application that connects farmers and buyers.
It allows farmers to manage agricultural products and buyers to search and order them.
The system is built using Java OOP concepts,
Key focus:

- Product management
- Order management
- Menu-driven system

PROBLEM STATEMENT

Farmers often face difficulty selling their products directly to buyers.

Problems include:

- Lack of direct connection
- Difficulty managing product information
- Inefficient ordering process

This system solves these problems by creating a simple console-based marketplace.

OBJECTIVES

The objectives of this project are:

- Create a menu-driven console system
- Allow farmers to add, update, and delete products
- Allow buyers to view and search products
- Allow buyers to place orders
- Implement Object Oriented Programming
- Store data using arrays

DATA STORAGE STRUCTURE

The system stores data using arrays.

Product Table:

- Product ID
- Product Name
- Price
- Quantity

Order Table:

- Order ID
- Product ID
- Quantity
- Total Price

HOW TO BUILD THE SYSTEM

Steps used to build the system:

1. Identify system entities (Product, Order)
2. Create classes for each entity
3. Implement arrays to store data
4. Build menu-driven console interface
5. Implement CRUD operations
6. Add exception handling for invalid inputs

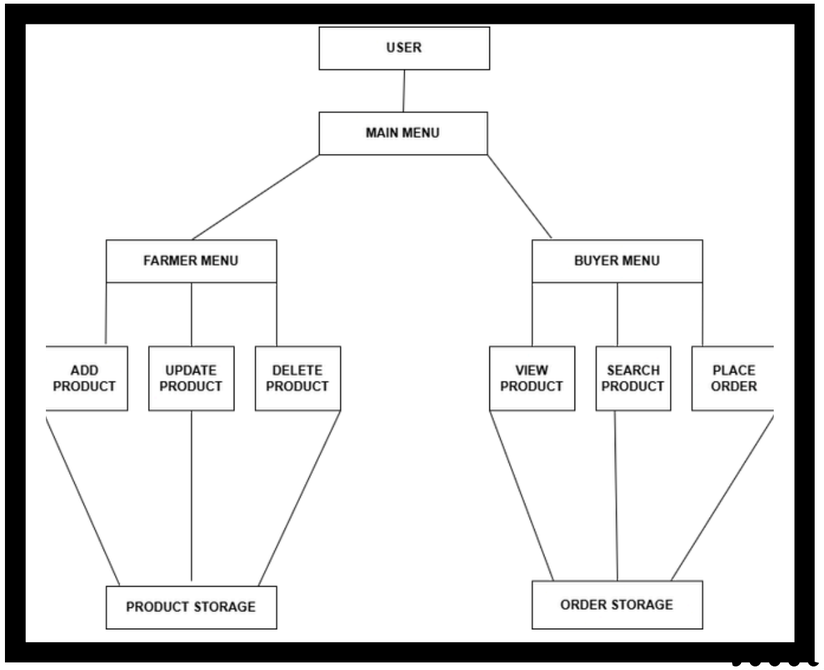
DIAGRAM

Entities:

- User
- Product
- Order

Relationships:

- Farmer manages products
- Buyer views products
- Buyer places orders



ADVANTAGES

- Easy product management for farmers
- Simple console interface
- Demonstrates Java OOP concepts
- Efficient product searching
- Basic order management system

CONCLUSION & FUTURE SCOPE

Conclusion:
FarmConnect demonstrates the implementation of Java OOP concepts in a real-world scenario.

Future Improvements:

- Add database (MySQL)
- Develop GUI interface
- Add user authentication
- Add payment system

OUTPUT SCREENSHOTS

```
===== Main Menu =====
1 Farmer
2 Buyer
3 Exit
```

```
----- Farmer Menu -----
1 Add Product
2 Update Product
3 Delete Product
4 View Products
5 View Orders
6 Back
```

```
----- Buyer Menu -----
1 View Products
2 Place Order
3 Back
```

```
ID: 101
Name: Rice
Price: 200.0
Quantity: 12
```

THANK YOU
